Graduates of high school majoring in Software Engineering (RPL) who have good communication skills, are adaptable, honest, and want to continue learning about new things. Graduated with good grades

EDUCATION

2020 - 2023

SMK TI Bali Global Klungkung

Major in Software Engineering (RPL)

WORK EXPERIENCE & PROJECTS

January 2022 - April 2022

Web developer (internship) - Politeknik Nasiosal Denpasar (Polnas)

Duties & Responsibilities:

- **Design and Develop** a website: create a simple student registration form website using the PHP programming language, which is connected to the database, and can CRUD (Create, Read, Update, Delete).

April 4, 2023 - April 6, 2023

Software Engineering Practice Exam - SMK IT Bali Global Klungkung

Tasks and Responsibilities:

- **Day 1** design and build an average value finder calculator: build a calculator system that can find the average value with arrays, while loops, and for loops, using C++ programming language.
- **Day 2** design and build a simple store application: build a store application with JAVA programming language, which is connected to a database. Of course, this application supports CRUD (Create, Read, Update, Delete), and has login, signup, and logout features.

- **Day 3** Design and build a hotel booking website: Build a hotel booking website with PHP programming language, which is connected to the database, with a system that can already CRUD (Create, Read, Update, Delete), login, signup, and logout. Plus the system can already print booking receipts.
